### Course Description

This course is an interdisciplinary survey of “New World” religions—indigenous and immigrant traditions that have made a home in America—and of new “world religions”—American traditions that have found their way to other lands. What does it mean to map the American landscape as site of religious migration, to analyze the American nation-state as religious importer/exporter? Relying on the theories and methods of comparative religious studies, we explore themes of similarity and difference, continuity and change, indigenization and globalization. Course readings include primary texts and scholarly interpretations; class lectures and discussions focus on contemporary issues and are supplemented by guest speakers and audiovisual presentations. Students have the opportunity to deepen their appreciation for American religious diversity, to broaden their understanding of responsible citizenship in the context of an emerging global society, and to develop their critical skills for use in academic, professional, and personal settings.
